CARBON CURLERS LOSE TO SWALWELL

On Tuesday afternoon of this week two Carbon rinks with L. Poxon and R. J. Fairbairn as skips, motored to Swalwell to compete for the MacDonald Trophy, which is now held by that town.

The games were close and at the finish Swalwell was 1 point up. R. J. Fairbairn won his game with a score of 15-14; and L. Poxon lost with a score of 15-17. 16 end games were played.

Those playing on the Carbon rinks were, L. Poxon skip, G. F. McGregor, Geo. Malton, and J. J. Greenan.

R. J. Fairbairn skip, H. Jealous, Stan Carney and Roy Wacker.

Swalwell succeeded in capturing the trophy from Trochu a couple of weeks ago and last week Three Hills invaded the citadel at Swalwell, but the visit-

ing team could not lift the cup. Later Acme was to play at Swalwell, but for some reason or other they could not get to Swalwell on the date set and Carbon's challenge being in turn, the result was the games that were played Tuesday afternoon.

CARBON ELKS HOLD VERY SUCCESSFUL SOCIAL EVENING

The social evening held in the Elks' hall last Thursday evening, proved successful in every way and a large crowd filled the hall on the occasion. The program for the evening consisted of a debate, "Resolved that the platform had more influence than the press," and Wilfred Poxon and Jack Code took the negative, while Hugh MacDonald and Gordon Ramsay handled the affirmative. The latter side won the debate, due to better delivery, equal points having been given for material and English.

Other items on the program were:

Mary had a hacking cough. But now she coughs no more; For Mary purchased Creophos at the Nyal Druggist's store.

CREOPHOS is a valuable remedy for Chronic Bronchitis, lingering deepset, stubborn coughs. Possesses unusual value in rundown conditions and a tendency towards weak lungs.

LITTLE ITEMS OF LOCAL INTEREST

Miss Olive L. Charlebois, teacher of the Marne School, wishes to thank her many friends for their hearty co-operation in the success of the Christmas entertainment at her school.

I. Guttman was a Calgary visitor last week.

Edythe Braisher returned to Calgary Sunday last after spending the Christmas holidays at her home in Carbon.

Hugh MacDonald returned to Calgary the first of the week to resume his studies at Normal school.

Miss Ella Halstead has secured a position teaching school near Craigmyle and she left last week to take up her new duties.

Miss Millicent James returned to Edmonton on Saturday last to resume her studies at the Provincial Normal school.

Roy English, who is attending the University of Alberta at Edmonton, returned to that institution last Thursday after spending Christmas and New Years here with his parents, Mr. and Mrs. H. A. English.

A beginners' class commences in the Carbon school on Monday, February 3rd and all children who are six years or over will be admitted. It is the intention of the school Board to have two beginners classes each year, one in the fall and one the first of February, so that many who are not quite six years of age at the opening of one term will not have to wait another year before commencing school.

A new water heater was installed in the Carbon Bus this week and now passengers will be able to ride to and from Calgary in comfort.

Piano duet by Mrs. McKibbin and Miss Watkins and a solo by Mrs. H. Evans. Following this program the remainder of the evening was spent in dancing and excellent music was provided by the Jolly Ramblers Orchestra. At midnight a delightful luncheon was served.

This social evening was given by the Carbon Elks, and the general public was invited.

ALBERTA AUTO 1930 LICENSE PLATES GREEN AND WHITE

New regulations governing motor license applications in this province will affect some 97,000 car owners on and after January 1, 1930.

The change deals mainly with the application forms, of which there will be six copies attached together in a perforated form. The installation of a modern card system for handling the thousands of registrations in this province has resulted in the license application system being improved.

The growth of the work handled by the provincial department has made it necessary to have some improved automatic system. When the motor license regulations were put in force 26 years ago there were 41 licenses issued in this province. That number increased to 55 the following year but fell to 45 in 1905. In 1909 the total was 245; 1920 boasted 38,015. From that time the figures steadily soared, reaching approximately 97,000 this year.

Alberta will have green and white number plates for 1930—a green background with letters and numerals in white. All truck license plates carry a distinguishing letter according to the classification of the vehicle. Letters will range from A. to F.

The letter "A" will be vehicles operated by a public carrier, "B" for vehicles used for the distribution of goods to persons dealing in same; "C" for vehicles mainly used by owners in their own business; "D" for vehicles mainly used by owners within the boundary of an incorporated town, but occasionally outside; "E" for all other vehicles.

WHEAT POOL NOTES

Steady advancement was made by the Alberta Wheat Pool during the 1929 calendar year. The increases in membership reached a total of 4,369, the Pool ending the year with 41,410 members on its lists. In view of the fact that all the first series contracts expired in August 1928, this membership record is considered very satisfactory by Pool officials. It shows a tremendous confidence in the Pool on the part of a large proportion of the grain farmers of Alberta.

At the end of 1929 the Alberta Wheat Pool was operating 439 elevators. During the year 86 new elevators were built and 36 purchased, which together with one elevator leased, makes an in-

HOCKEY TEAM VISITS 3-HILLS

The local hockey team journeyed to Three Hills last Friday evening to meet the Intermediate hockey team of that town in a friendly game and the result was that the Carbon boys were defeated by a score of 4-1. The game was not one-sided by any means, and the fault of the Carbon team was the lack of practice and combination work, while the Three Hills boys showed that they were right there when it came to playing the game.

It is expected that the Three Hills team will play a return game in Carbon in the near future.

The Carbon line-up was as follows: Goal, Leo. Halstead; Defence, A.R. Lynn and W. Hilton; Forwards, Jack Spence, Stewart Hay, Jas. Taylor, Ed Rouleau, Bruce Ramsay, Gordon Ramsay and Geo. Oliphant. Stan Carney acted as manager of the local team.

The players had a hectic trip both to and from Three Hills, on account of the snow drifts on the roads and it was only with the bodily effort of the ten players that the return trip was completed.

crease in Pool elevators of 123 for the year. Additional storage was provided for Vancouver terminal No. 1, bringing the total capacity of the plant up to 3,150 bushels.

Total Alberta Pool handleings from the 1828 crop amounted to over 67 million bushels, 72 per cent of which was shipped to the Pacific coast. Nearly 47 million bushels were handled through Alberta Pool Elevators, representing 70 per cent of the total.

The outstanding feature of 1929 in so far as the Wheat Pool is concerned was the steady confidence evinced in the organization by the great majority of the members as well as by the greater percentage of the general public. The Pool encountered difficulties during the year largely due to unusually heavy production of wheat in practically every country of the world. In spite of this feature the marketing policy of the Pool maintained a constant steady effect on the world price of wheat.

Don't forget the play "Star Bright" in the Elks Hall tomorrow night.

'Fresh from the gardens'

Western Canada's Air Mail

Early in this new year of 1930 there will be inaugurated Canada's first all night air mail route, thus marking another advance in the Dominion's postal service. Western Canada enjoys the distinction of being the scene of this great undertaking which will at the outset embrace all three of the prairie provinces.

This night air mail will have Winnipeg as its eastern terminus, and Calgary as the western terminus, while Regina will be the central divisional point where the planes will meet and transfer mails, passengers, and air express. From Regina also, at a later date, will start the night air mail for Edmonton via Saskatoon and North Battleford, and at the Saskatchewan capital the Edmonton planes will make connections with those from the east and west.

Citizens of Regina are fully alive to the importance of this development, and at the recent municipal elections overwhelmingly approved of a money bylaw providing for the expenditure of \$160,000 on the municipal air harbor. This is by far the largest sum yet appropriated by any western city for the establishment of terminals for the latest of all transportation systems, but, whatever the people of other centres may think about it, the citizens of Regina are convinced of the future of air transportation.

The municipal airport at Regina is being laid out on a big scale and in a comprehensive way under the direction and advice of experts. A large block of land has been set aside for the purpose, streets running through it closed, runways for the taking off and landing of planes from various points of the compass constructed, airdromes built, workshops and filling stations are being provided, telephone connections established, a continual weather report service arranged for, and the whole field brilliantly lighted. Motor taxi services from the airport to the railway station, post office and city hotels will be in operation.

At Regina planes will arrive from Winnipeg, Calgary and Edmonton nightly, and from Regina's other planes will take off for all three cities. Already efforts are being put forth to secure the establishment of a fourth service from Regina to the nearest point in the United States on Uncle Sam's air mail routes, so as to provide for rapid communication with all United States points in the Western and Pacific coast states.

In order to make night flying safe and successful, the air routes to be followed must be illuminated, and the post office department has erected beacons at intervals of twenty-five miles all the way from Winnipeg to Calgary, and in a few months similar beacons will stretch from Regina to Saskatoon and on to Edmonton. A writer in an Eastern paper thus describes what a passenger on a night air mail plane will experience, starting from Winnipeg.

"As you leave behind the lights of the Winnipeg airport, then the blazing highways of the city, you see below darkness, broken here and there by the glimmer of small settlements and suburbs of the city. As the plane climbs higher, you become aware of crawling animals below, their two small eyes classify them as automobiles, and you know that below lies one of the provincial highways. A few minutes out of the lighted district and far ahead a peculiar light blinks. You watch it carefully, draw nearer to it, and see that it is a revolving light, a beacon, turned upwards. Somewhere below it in the darkness another colored light blinks at you. That is the marking on the beacon. It tells the pilot where he is on the course. You pass the light, look back and see that it goes on winking. Then a little later another light blinks at you. If you ask the pilot he will tell you that these are the first light beacons on a Canadian airway, that they are of two million candle power and revolve six times a minute. They are the aerial lighthouses.

"Towns pass below, their lights marking them, and with the aid of the map which the pilot has given you, it is not difficult, if you are watchful, to know your whereabouts. The pilot explains the marking signals on the beacons and you can follow the course yourself."

And so on, passing over the Parliament Buildings to land at Regina's modern airport, where a scene of activity will be found to prevail as passengers alight, mails are unloaded or transferred for Calgary or Edmonton and intermediate points, the planes are refuelled, and with but a short delay are zooming their way to their several destinations.

Undoubtedly, the inauguration of this all night air mail service in Western Canada, and the enormous saving in time effected in the delivery of important mail matter, will be one of the outstanding events of 1930, the forerunner of night flying air mail planes all over the Dominion.

From 40 to 50 feet a day is rated as a fair distance in digging a tunnel through a mountain.

A man is sane morally, at thirty, rich mentally at forty, wise spiritually at fifty, or never.

It is estimated that on the average 23 new buildings are completed and six torn down every day in New York City.

Glasgow, Scotland, is the second largest city in Great Britain.

When Pain Comes

What many people call indigestion is often excess acid in the stomach. The stomach nerves have been over-stimulated, and food sours. The corrective is an alkali, which neutralizes acids instantly. And the best alkali known to medical science is Phillips' Milk of Magnesia. It has remained the standard with physicians in 50 years since its invention. One spoonful of this harmless

tasteless alkali in water will neutralize instantly many times as much acid, and the symptoms disappear at once. You will never use crude methods when once you learn the efficiency of this. Get a small bottle to try. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

To Hold Reunion

Ex-Students Of Manitoba Agricultural College Will Meet At Regina

Ex-students and graduates of Manitoba Agricultural College now residing in Saskatchewan are planning to hold a reunion in Regina about the end of February, probably at the end of the week, during which the meetings of the Western Canada Livestock Union takes place. Details in connection with the reunion are in the hands of an executive consisting of M. J. McPhail, chairman, Isabell Robson, Ruby Crealock, Cliff, Dempsey and W. W. Thomson. It is hoped that a large number of M.A.C. ex-students will make it convenient to attend the Regina reunion which has developed into an annual event. Write M. J. McPhail, care of Livestock Branch, Department of Agriculture, Regina, for details.

RHEUMATIC VICTIMS

Can Find Relief Through Building Up the Blood

Pain is the symptom of rheumatism that every victim recognizes, and he generally attributes the trouble to cold, damp or changeable weather. But doctors know that thin blood is a marked characteristic of the trouble. Trying to cure rheumatism while the blood remains thin and poor, is an impossible task because there is nothing to build on. A tonic like Dr. Williams' Pink Pills that enriches the blood and frees it from poisonous impurities soon banishes rheumatism from the system. So long as the blood is maintained in a healthy condition the trouble will not return. This is not theory. It has been proved in hundreds of cases; here is one:—Mr. J. W. Rose, R.R. 2, Albany, P.E.I., says:—"For some years I was a great sufferer from rheumatism and although I tried a great many remedies I did not get any permanent relief until after I took Dr. Williams' Pink Pills. The trouble was located mostly in my shoulders, and at times was so bad that my right arm was almost useless. Of course I suffered much pain and great inconvenience. My attention was directed to Dr. Williams' Pink Pills through an advertisement in our newspaper, and I decided to try them. I took the pills according to directions with the result that the rheumatism has left me, and I have never had a twinge of it since. If this meets the eye of any rheumatic sufferer my advice is try Dr. Williams' Pink Pills at once."

You can get these pills from any medicine dealer or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Will Subscribe To Memorial

German Sub Engineer Promises Aid For Welland Project

Many touching incidents have been recorded in the drive for funds in the Welland-Crowland War Memorial campaign, but none as sincere as the promise of support from Fred Zalud, who conducts a small hardware business in the market line, at Welland, Ont.

Mr. Zalud served as submarine engineer with the German navy during the entire period of the world war on the North Sea and Atlantic Ocean, and is wholeheartedly behind the memorial project.

Persian Balm promotes daintiness, charm and beauty. It is unrivaled in its magical effect on the skin. Swiftly absorbed by the tissues, it leaves never a vestige of stickiness. Delightfully cool to the skin. Stimulating and invigorating. Softens and makes the hands flawlessly white. Subtly fragrant. Imparts youth and loveliness to the complexion. Persian Balm is the inevitable choice of the woman who cares.

North American Fish

U.S. Bureau Of Fisheries Ships Nineteen Varieties Of Fish For Breeding Purposes

The North American continent, says the National Geographic Society, Washington, has four times as many varieties of fish than Europe. In the last five years the United States Bureau of Fisheries has shipped breeding stock of 19 varieties to foreign countries, some of them having been found to thrive even better in their new element than in their native waters. From Argentina came word that "American trout and bass have thrived so well that there are too many of them."

Scotland and Belgium are the two European countries in which the accordion, which celebrated its centenary this year, are most popular.

Canadian Doctor

Acclaimed By U.S.

Child Mind Concern Of Dr. W. E. Blatz, Mental Hygienist

In at least one department of Mental Hygiene, Canada is admittedly leader on this continent.

Very quietly, during the past few days, leaders in child study in the United States gathered in Toronto to investigate the methods of Dr. W. E. Blatz, professor of psychology, of the University of Toronto, whose study of the mental hygiene of children has in the words of a well-known psychiatrist, "taken him out of the laboratory and into the home and school."

Representatives of such outstanding organizations as the Laura Spelman Memorial Fund, the Julius Rosenwald and McCormick Funds, of Chicago, and the University of Chicago, conferred here with Dr. Blatz, carefully examined his methods, expressed unqualified approval and stated their intentions of encouraging the adoption of those methods in American cities.

The superiority of Dr. Blatz's methods lies in the fact that he works with living material, rather than with theories. For six years he has catalogued and cross-indexed the seemingly insignificant vagaries of pupils at a certain public school in Toronto, and plans to follow these pupils through high school and the University, into the workaday world, gathering material as they go, which may be of value to students of the mind.

No man or woman should hobble painfully about because of corns when so certain a relief is at hand as Holloway's Corn Remover.

New Technical School

To Be Erected In Saskatoon At a Cost Of \$500,000

Saskatoon's new technical school, to be erected at a cost of approximately \$500,000, will be built on Spadina Crescent, in the central part of the city, the high school board decided at a recent meeting. Necessary property, west of the Armories, will be acquired for approximately \$66,000.

The cost of the technical school is to be divided between the city, provincial and federal governments. The city's share is \$250,000; approved in a recent bylaw, and the two governments will contribute \$125,000 each.

Minard's for the Ideal Rubdown.

Shipment Of Live Mink

The largest shipment of live mink ever sent from St. John, N.B.—and perhaps from any other Canadian port—to Europe left on the S.S. Montcalm, for Germany, December 12th. There were 240 animals in all, two-thirds of which were males. Ninety-six silver foxes from Prince Edward Island also were conveyed on the same vessel.

Additions To Canadian Navy

Royal Canadian Navy Strength To Be Increased By Two New Destroyers

The expenses of the Royal Canadian navy ran to \$1,836,487.65 during the fiscal year ending March 31, 1929, according to figures published in the annual report issued by the Department of National Defence.

The total strength of the navy during the year was 94 officers and 616 men. The strength of the Royal Canadian Navy volunteer reserve, at the end of the fiscal year had a strength of 62 officers and 795 men.

The placing of contracts for the construction of two new destroyers also makes a definite advance as heretofore no new ships have been commissioned for service in the Royal Canadian navy.

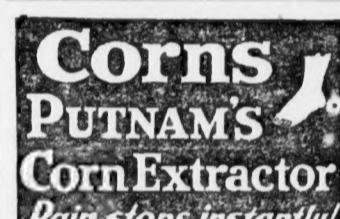

The report mentions elsewhere, that the cost of these two new ships the Saguenay and the Skeena, which are to be delivered in 1931, will be \$3,350,000, including armament.

Drives Asthma Before It. The smoke or vapor from Dr. J. D. Kellogg's Asthma Remedy gives asthma no chance to linger. It eradicates the cause. Our experience with the relief-giving remedy shows how actual and positive is the succor it gives. It is the result of long study and experiment and was not submitted to the public until its makers knew it would do its work well.

Girls who work in Japanese mills receive, on an average, the equivalent of \$15 a month in wages.

A Good Idea
is, to treat all sore throats, bronchitis, croup, bronchitis, cough, whooping-cough and tonsil ills with "Mrs. Sybilla Spahr's Tonsilitis," good results or money back. You can't lose, try it. \$1.50 post paid. Agencies wanted.

Canadian Art Shows Distinctive Character In Notable Collection Of National Gallery of Canada

An accession of 20 new pictures to the National Gallery of Canada, the most important group acquired at any time for any collection on this continent, has featured the general activities of that body for the past year. The various schools of ancient and modern art are now represented, to a much more substantial degree than heretofore, with the old masters retaining a prideful place alongside the enterprising and robust generation of artists whose vigor and daring have contributed distinctive character to Canadian art.

The most recent development of a stimulating phase will be displayed when, on January 23, His Excellency the Governor-General formally opens the Canadian Exhibition at the National Gallery.

It is expressed that this will be the most representative ever held in Canada, since new arrangements have now been made for the assembling of pictures. Some complaints were voiced in the House of Commons last session to the effect that in those annual displays the painters of the central provinces appeared to have entirely crowded out those from the east and west coasts; and the opinion was advanced that this might be due to prejudice on the part of those responsible. In order to obviate any such charge, the trustees have completed a scheme whereby outstanding artists of the various cities in Canada may constitute themselves advisory committees and recommend to the trustees the works of local painters. This has had the effect of bringing to light artists of hitherto unknown merit, and of assembling a collection representative of Canadian art from Halifax, N.S., to Victoria, B.C.

Many developments are foreseen for the National Gallery in the near future. For some considerable time the inadequacy of the present building, which is shared with the Victoria museum and the Department of Mines, has forced itself upon the government. The restricted quarters have made it impossible for the gallery to exhibit all its treasures, and thus deprived the people of their right to enjoy their possessions. To this post war generation the most unfortunate element in this is the fact that the Canadian war memorial pictures have been forced from the gallery's walls and are now stored away, out of sight.

This collection, valued at over \$1,000,000 and which could not under any circumstances whatever be replaced, was acquired during the war by Lord Beaverbrook's war memorial committee. The paintings depict every phase of Canadian war activity, and many outstanding battles fought by the Canadian Corps have been translated on canvas. Portraits of Canadian soldiers, Victoria Cross heroes, and well-known officers are numerous in the collection.

Modern artists of the calibre of Sir William Orpen, Augustus John A. J. Munro, A. Y. Jackson, Cyril Barraud and scores of others contributed to this immense group, which numbers over 1,000 pieces. Some old masters are also included—works by Romney, Lawrence, West and Reynolds. The entire collection was given to the Canadian people nine years ago, but due to lack of room it cannot be exhibited.

"I don't know—I haven't been summoned over it yet." —En Rollig Half Timma, Gothenburg.

A Pearl Among Collar Buttons

When Chauncy Rundle Watson was 17 years old, he was given a shiny gold collar button for his birthday. He recently observed his 49th birthday still wearing the same shiny gold collar button. He has worn the button continually for 32 years and not even once has it been mislaid, he solemnly declares.

A man never really gets an accurate estimate of himself until he wants to borrow his neighbor's lawn mower.

Province Developing Resources

Saskatchewan Clay, Coal and Chemical Deposits Being Exploited

The past year has been a busy one for the manufacture of clay products in Saskatchewan according to Professor W. G. Worcester, of the Ceramics Department of the University of Saskatchewan.

A new plant has been started at Prince Albert during the past year for the manufacture of common brick and a plant at Estevan for terracotta and floor and wall tile. The company at Estevan has built an additional plant for the manufacture of hollow building tile.

"There has been greater development during 1929 of the mineral resources of Saskatchewan than in any previous year," Prof. Worcester claims. "More than 100 lakes in the province have large deposits of sodium sulphate. At Englebright a depth of 150 feet has been drilled without coming to the bottom of the deposit. This chemical is now being used in metallurgical work and the Saskatchewan deposits are beginning to have a value as they are unusually pure. One firm in Canada is at present using 25,000 tons of sulphate a year from their plant near Ormiston. The sulphate is also used in the pulp industry.

"During the year the experimental briquetting plant at Estevan passed into commercial hands and is now shipping out 100 tons per day. A new process of carbonizing the lignite promises to be of great benefit to the Saskatchewan deposits."

Officers Elected

Canadian Sheep Breeders' Association Elect Directors For 1930

Mr. R. W. Wade, secretary-treasurer of the Canadian Sheep Breeders' Association, announces that the mail ballot, closed December 15th, electing directors for the Maritimes, Manitoba, Alberta and British Columbia, resulted as follows:—Maritimes, Ronald Chisholm, Antigonish, N.S.; Manitoba, George Gordon, Oak Lake, Man.; Alberta, John Wilson, Sr., Innisfail, Alberta; and George R. Ball, No. 2, Strathcona, Alberta; British Columbia, Leonard Higginson, R.R. No. 2, Sardis, B.C. The directors for Ontario and Quebec will be elected at the provincial annual meeting of the Association, taking place in February, and for Saskatchewan, at the annual meeting of the Canadian Association, in March.

Butter Imports

Imports Of Butter Into Canada Doubled In Past Year

Butter imports into Canada doubled in the twelve months ending November 30. The figure for the period was \$11,424,000 as against \$5,567,000 in the preceding twelve months. Other imports of milk products remained about the same, bringing the aggregate value of \$12,150,000.

In November alone, butter imports were up to \$1,085,000 from \$667,000 in the preceding month. Figures were made available at the Dominion Bureau of Statistics, Ottawa.

Traffic over the Iraq-Syria trans-desert automobile route is rapidly increasing.

Opinion Favors Movement To Be Made To Settle Arable Lands In H. B. Railway Area

Between miles 137 and 327, on the Hudson Bay Railway, lies a vast belt of clay land awaiting to produce good crops for the pioneer who has the courage to go north and homestead. A year ago Hon. Charles Stewart, minister of the interior, declared that the government was ready to help homesteaders get a start in northern Manitoba. But there has been negligible interest to date among Canadians. Now the suggestion has been made that Mennonites be imported to start agricultural band wagon "north of 53."

Harbored in Germany today there are thousands of Mennonites who are refugees from Russia. Mennonites, who have settled in western Canada in recent years have become known as good farmers, hard-working, businesslike and peace loving. At the present time prominent westerners argue that federal authorities should modify restrictions to allow these refugees to pioneer in the northland.

The entire matter will likely come before northern boards of trade after new year. In northern Manitoba the opinion is growing that a move must be made soon to settle the agricultural regions in the Hudson Bay Railway area.

In a recent editorial headed "A Chance For the Mennonites," The Northern Mail, of The Pas, remarked that "the Mennonites are good farmers and not afraid of work. They can be pioneers. If they were shown this great belt of northern country early next spring, with its proximity to the markets of the world, its rich clay soil, its lumber, its fur and its bordering lakes and rivers teeming with fish, they would be interested."

"They could start a farming community in the north country, and with some government help could prosper."

About 17 varieties of wheat have been grown beyond The Pas. Not all of the tests have been eminently successful, but plenty of progress has been made to prove that fortunes in agriculture lie dormant in northern Manitoba.

The clay belt contiguous to the Bay line is an extension of the Ontario belt, says a recent report of the Federal Department of Agriculture. Last summer, an expert agriculturist of the experimental farms branch, made a survey of the territory between Hudson Bay Junction, Sask., and Mile 445 of the Bay Railway.

In a summary of his tour, he said: "From Mile 137 to 327 the line passes through the clay belt and there is much good soil not hampered by rock, that, once drained from muskeg, will make good agricultural territory. Most of the mining people think a person is insane who appears in the north country to seek agricultural possibilities. Notwithstanding this lack of faith, I am convinced that when this territory is needed for settlement, the possibilities are there."

And dairy farming is another industry that would flourish in the north country. Of course, it will naturally follow land settlement.

Wooded terrain predominates from

Hudson Bay Junction to The Pas. And heavy timber continues to Cormorant, Mile 42, on the Bay road. There are also many outcroppings of rock.

Gardens are numerous at Cormorant, however, and trial plots of wheat, oats and barley were ripe on August 25, when the agriculturist inspected them. Wheat samples included Garnet, Reward, Ceres, Marquis, and Minden. The stands were from 40 to 48 inches in height. Alaska, Gopher, Banner and Victory were included in the oats samples.

At Mile 185, George Cowan boasts a good flower and vegetable garden. The touring agriculturist was surprised at the flourishing fruit trees. The crab apple and the plum trees were in fine shape, and a good crop of raspberries was harvested. Potato yield was again splendid, and Garnet, Reward and Ceres wheats grew well. Oats and barley were more than satisfactory.

Two homesteads are established at Mile 214. Garden plots are good, but conclusions as to general soil fertility cannot be reached until next year. Mile 237 produced a bumper crop of vegetables, including lettuce, onions, peas, beets and potatoes.

Vegetables prospered at Mile 327 this season.

General farming has not been attempted beyond Mile 327, but once settlement is under way the march of the agricultural frontiers northward will progress on its own momentum.

Saskatchewan Fisheries

Total Value Of Catch More Than Half A Million Annually

The fact that Saskatchewan fisheries run to a total value of more than \$500,000 annually is of particular interest, in view of the negotiations now pending for the return of the natural resources. Fish caught in Lake Athabasca, the greater part of which lies in Saskatchewan, are not included. For some reason federal authorities in making their reports, give Alberta credit for all the fish caught in that lake, and the value in 1928, the last year for which figures are available, was \$256,000. Cold Lake is another for which Alberta gets full credit, but in that case the greater part of the lake is in Alberta, and the total catch is light.

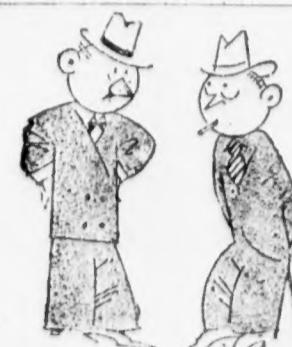

The varieties of fish caught commercially in the province are gold-eyes, herrings, mixed fish, pickerel, pike, sturgeon, millets, trout (lake), tullibee and whitefish, the latter having a market value of \$439,075.

Claim Is Discounted

Isolation Of Flu Germ Not Yet Accomplished, Says Medical Journal

Publishing the preliminary report of Dr. I. S. Falk, on his isolation of the influenza germ, the Journal of the American Medical Association says that while Dr. Falk's work is of great interest, it does not warrant the assumption that the way to an influenza vaccine has been found.

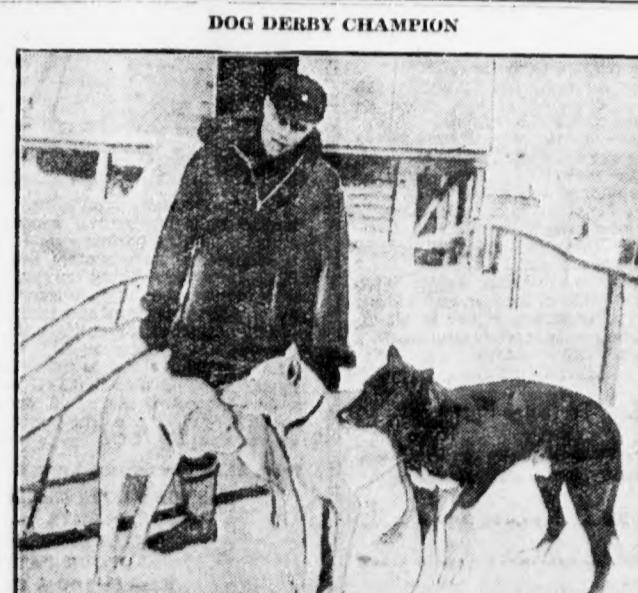

The journal asserts that "to intimate" as was said in numerous interviews, editorials and other publicity relative to this discovery, that the way is now clear for vaccine or anti-toxin or any other specific method of treating influenza is to go far beyond the actual evidence provided by this bacteriological research.

"Congratulations! I have heard that you are to be married."

"I have never thought of such a thing."

"Congratulations." — Gutierrez, Madrid.

Emil St. Goddard, 24-year-old French-Canadian dog derby champion, hopes to meet Leonard Seppala, Alaskan musher, in the 200-mile non-stop marathon being staged at The Pas next March. St. Goddard, who has won the race for the past five years, is seen with some of his dogs. The black one is Toby, his aged, but still famous leader. (S.N.S.)

"That is a nice overcoat — how much did it cost?"

"I don't know—I haven't been summoned over it yet." —En Rollig Half Timma, Gothenburg.

PEPS

for Coughs, Colds & Bronchitis

THE BREATHE-ABLE TABLET

WORLD HAPPENINGS BRIEFLY TOLD

France's 1930 naval budget calls for the construction of one cruiser, six destroyers and six submarines. These projects were adopted by the Chamber of Deputies.

Palestine is indulging in more flying. The airdrome at Kalandia, ten kilometers north of Jerusalem, is being enlarged. Twenty dunams of land have been acquired for the purpose.

The past year has been a busy one for the manufacture of clay products in Saskatchewan, according to Professor W. G. Worcester, of the ceramics department, of the University of Saskatchewan.

Resident in Edmonton for 60 years, and one of Western Canada's earliest pioneers, Mrs. Kenneth McDonald died there at the age of 101 years. She was born at Cumberland House, Sask., on May 27, 1827.

The Aeronautic Society has issued a statement that the projected North Pole expedition in the dirigible Graf Zeppelin has been called off for 1930, but that it is fully expected the flight will be made in 1931.

Fire, believed to have been caused by a defective flue, destroyed the government radio station at Nome, Alaska. A small amount of equipment was saved and communication again established with St. Michaels, about 250 miles away.

Convinced that there is no hope of finding alive Pilot W. Canon and Mechanic George Lizottee, employees of the Curtis-Reid Aircraft Co., lost in Northern Quebec for nearly three months, the National Defence Department ordered the detachment of five Canadian Air Force planes to abandon the search.

Every careful and observant mother knows when her child suffers from worms. She also knows that if some remedy be not speedily applied much harm will result to the infant. An excellent preparation for this purpose is Miller's Worm Powders. They drive worms from the system and set up stimulating and soothing effects, so that the child's progress thereafter is painless and satisfying.

Manitoba Fox Breeders

In competition with entries from all parts of Canada and the United States, Manitoba fox breeders took most of the awards at the recent Western Canada International silver fox show.

Only two flowering plants occur on the Antarctic plateau, and these are rare.

Pains Around Heart Weak Spells Would Fall Over

Mrs. James Vanalstine, Pibroch, Man., writes: "I had pains around my heart, and suffered with weak, smothering spells. Sometimes I would fall over and would have to be picked up and put to bed. I used several boxes of

and it is now over three years since I have had a spell.

"I hope anyone who is in the same condition I was will give H. & N. Pills a fair trial."

Price, 50c, a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Swine Breeders Elected

Canadian Swine Breeders' Association Directors For 1930

Mr. R. W. Wade, secretary-treasurer of the Canadian Swine Breeders' Association, announces that the mail ballot, closed December 15th, electing directors of the Maritimes, Manitoba, Alberta and British Columbia, resulted as follows:—Maritimes, Peter Brodie, Little York, P.E.I.; Manitoba, A. C. McPhail, No. 5, Brandon, Man.; Alberta, W. L. Gray, Millet, Alberta; British Columbia, J. W. Shannon, No. 2, Cloverdale, B.C. The directors for Ontario and Quebec will be elected at the provincial annual meeting of the Association, taking place in February, and for Saskatchewan at the annual meeting of the Canadian Association, in March.

Deaf Hear Again Through New Aid

Earpiece No Bigger Than Dime Wins Enthusiastic Following Ten-Day Free Trial Offer

After twenty-five years devoted exclusively to the manufacture of scientific hearing aids, the Canadian Acousticon, Ltd., Dept. 2046, 18 Bloor Street, St. W., Toronto, Ont., has just perfected a new model Acousticon that represents the greatest advance yet made in the re-creation of hearing for the deaf. This latest Acousticon is featured by a tiny earpiece no bigger than a dime. Through this device sounds are clearly and distinctly transmitted to subnormal ears with wonderful benefit to hearing and health alike. The makers offer an absolutely free trial for 10 days to any one person who may be interested, and a person who will be one of these remarkable aids to your home for a thorough and convincing test. Send them your name and address today.

British Nobility Farmers

About Fifteen Thousand Acres Of Alberta Farm Land Held By British Nobility

About 15,000 acres of farm lands in Alberta are now owned by titled members of the British nobility. Of these, the Duke of Sutherland carries the largest holdings. The Duke of Sutherland and the Sutherland Land Company owns 9,202 acres.

Earl Minto is the second largest holder, with 1,908 acres. He is closely followed by the Prince of Wales, whose famous E.P. ranch consists of 1,655 acres. In addition to this, however, the Prince leases another 1,440 acres, so that his total holdings are 3,005 acres, which brings him, actually, into second place.

Lord Cheylesmore has 1,380 acres to his name in Alberta, and Lord Rodney, 618 acres. The Earl of Egmont still holds 320 acres near Pridis, in Southern Alberta.

Cuts and Bruises Disappear.—When suffering from cuts, scratches, bruises, sprains, sore throat or chest, and any similar ailment, use Dr. Thomas' Electric Oil. Its healing power is well-known in every section of the community. A bottle of Dr. Thomas' Electric Oil should be in every medicine chest ready for the emergencies that may always be anticipated.

Ideal Air Port

City Of Moose Jaw Claims To Have One Of the Ideal Airports Of The World

The Moose Jaw Board of Trade claims for its city the possession of one of the ideal airports of the world. It points out that the soil of the field is black loam with gravel subsoil, therefore free from the conditions which invariably obtain after heavy rains. The field has a natural drainage, is virgin prairie, absolutely even, and is an ideal, all-weather site. No quagmires are possible and large, heavily loaded machines experience no difficulty in taking off at any season.

SUNDAY SCHOOL LESSON

JANUARY 12

BAPTISM OF JESUS

Golden Text: "This is My beloved Son, in whom I am well pleased." — Matthew 3:17.

Lesson: Matthew 3:1 to 4:11.

Devotional Reading: Psalm 32:1-7.

Explanations and Comments

The Baptism Of Jesus, 3:13-17.

After the return from Egypt, Jesus lived thirty years in Nazareth. Then, when John was baptizing, He came from Galilee to the Jordan to be baptized by him. In great surprise John exclaimed, "I have need to be baptized of Thee, and comest Thou to me?" But Jesus answered that it was fitting for them to fulfill all righteousness. John's baptism was "of repentance unto the remission of sins": why then did the sinless Jesus submit to the rite? His baptism was (1) a public endorsement of John as a messenger of God; (2) the baptism was of God (Matthew 21:25), hence He submitted to the righteous ordinance; (3) it was rite which He later enjoined on his followers; and therefore He would, Himself, submit to it; and (4) it was for Him a formal setting apart, a consecration, for His great mission.

As Jesus was baptized and went up from the water the heavens were opened unto Him. The open sky was a revelation to Jesus of spiritual forces that lay within His reach. "It was just as when Newton discovered the law of gravitation—heaven was opened to him; so Jesus saw the heavens open." — F. B. Meyer. And He saw the spirit of God descending as a dove, and coming upon Him: by these words we are told that He was filled with the spirit of God, and consecrated to His ministry. And He heard a voice out of the heavens, saying, "This is my beloved Son, in whom I am well pleased": in greater measure than before Jesus realized now His divine Sonship and His Father's pleasure. In the words of Dr. G. A. J. Ross, the self-consecration of Jesus was rewarded as is ours today by a clearer vision of the purposes of God, by a quiet consciousness of endowment with God-given capacity for His work, and by a vivid sense of holy and filial intimacy with the Divine Being Himself. "The Gospel records and our own reflection assures us that Jesus must have learned who He was little by little. The statement that He increased in wisdom is certification of this. And now the moment is one of crisis. A great new, marvellous truth has entered into His life, and He is saying over and over to Himself, trying to understand it in the fullness of its infinite meaning, 'I am the Messiah! I am the Christ! I am He for whom society has all along been looking for and waiting! I am come in answer to the prayers of the ages! I am the Servant of the Highest, the Ambassador for Heaven, the Son of God, the Saviour of the world!'"

Baptism is a rite expressive of consecration. The baptism of infants expresses the parent's dedication of their children to God. The baptism of adults is their own expression of consecration of themselves to God. "If there is no consecration, the baptism

is an empty, idle, unmeaning form; if there is consecration, the baptism is its fitting expression."

Logging In Northern Alberta Is Slack

Lumber Carried Over From Last Year Slows Up Work

Logging will be slack in northern Alberta this winter and there will not be the usual stir at the lumber camps. According to the manager of one lumber company, not more than 25 per cent. of the ordinary winter's logging will be done this coming season. The chief reason given for this is the enormous carry-over of lumber from last season.

This carry-over is due in large measure to the dry summer and consequent reduction in the wheat yield. The lumber business was dull all summer as a result of a drought affecting the farmers' building operations, many farmers having cancelled their plans for new buildings when the crops began to show the full effects of the dry summer.

Besides this there was a much smaller program of elevator-building in the country than in 1928, which was a record year. One big lumber firm states that its carry-over is 15,000,000 feet, the largest in the company's history.

Enough cars were produced in the first nine months of 1929 to lay all pedestrians end to end.

Opportunity knocks but once. That subsequent knocking you hear is done by your friends.

That Cold

So miserable and lasting. Shake it off with Minard's. Heat and inhale. Also rub on throat and chest.

WINDOLITE

The Improved Glass Substitute

MADE IN ENGLAND

WINDOLITE stands for 100 per cent. sunlight. It makes light but strong windows for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandahs, schools, factories, hospitals, sanatoriums, hot beds, plant coverings and greenhouses. It keeps out cold—will not crack or chip—cuts with an ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in rolls any length but in one width of 36 inches only. A square yard of WINDOLITE weighs about 14 ozs., while a square yard of glass of ordinary thickness, weighs about 135 to 140 ozs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price \$1.50 Per Square Yard, f.o.b., Toronto.

Use WINDOLITE and let

YOUR PLANTS

YOUR CATTLE

BAK IN 100% SUNLIGHT

SEND FOR BOOKLET "WINDOLITE"

COMES WITH A MESSAGE OF HEALTH

THE sun is the all-powerful life producer, Nature's universal disinfectant and germ destroyer, as well as stimulant and tonic. WINDOLITE is the sun's most important ally.

Medical research has definitely proved that from the point of view of Health and Hygiene, the most effective among the sun's rays are the Ultra-Violet rays, which possess the greatest power for the prevention and cure of disease and debility.

Science has further established that ordinary window glass does not allow the passage of Ultra-Violet rays, so that by using glass we are artificially excluding these vital health-giving rays. Therefore, the invention of WINDOLITE has completely satisfied the long-felt want. Exhaustive experiments have conclusively proved that it is a most effective substitute for glass, that it freely admits the Ultra-Violet rays, and that its use has a most beneficial effect on the growth and development of plants and chickens and on the well-being of cattle, enabled for the first time to have healthy light instead of darkness in their sheds.

Indeed, the discovery of WINDOLITE has during the last six years completely revolutionized gardening, given a new stimulus to poultry breeding, increasing the egg-laying capacity and fertility of chickens, has greatly improved the health of cattle and is now being used in domestic and household requirements.

GENERAL SMUTS HAS FAITH IN THE WORK OF LEAGUE

Ottawa.—The League of Nations and its astounding development along lines never contemplated by those responsible for its establishment furnished the theme of an interview accorded by General Jan Christian Smuts, former prime minister of South Africa, to newspapermen who called upon him at the home of Sir Robert Borden, war-time premier of Canada. The distinguished South African reached Ottawa on his first visit to Canada, and will be Sir Robert's guest during his stay.

Soldier, statesman and scholar, General Smuts is one of the romantic figures of empire history. In arms against Great Britain thirty years ago, he is now one of the bulwarks of British authority and one of the strongest protagonists of the British connection. General Smuts recalled the Boer War to the newspapermen somewhat whimsically. According to them permission to smoke, he himself refused the offer of a cigar, asserting his own non-smoking disposition.

"I haven't smoked for 30 years," he said with a smile. "Not since you Canadians and the British made tobacco so expensive and so hard to get during the Boer War."

"How do you square your conscience with that attitude and the general desire of South Africa to boost its tobacco products?" asked one of the reporters.

"My conscience doesn't trouble me on that score," replied General Smuts.

During the late war General Smuts served with Van Deventer in German South Africa and was later transferred to East Africa to command the British in succession to General Sir Horace Smith Dorrien. This campaign he successfully prosecuted. Recalling this phase of his distinguished career, he declared that his recent meeting in London with his old enemy and friend, General Von Lettow-Vorbeck, who had commanded the German forces in East Africa, was one of the greatest things he had ever experienced.

"I believe a reunion of that character will do a great deal of good, for it will indicate more than anything else the changed mentality of the world."

"I am here under the auspices of the League of Nations primarily," said General Smuts, in answer to another question. "But I welcomed the opportunity to visit Canada and the United States for the reason that I have not been on this continent before."

He will visit Montreal, Toronto, New York, Boston, Philadelphia, Washington and Cincinnati.

"The League of Nations," he said, "has developed along lines that were totally unforeseen by those who established it ten years ago. It is like a tree. You plant a seed, but you have no indication just in what fashion that seed will grow. So with the league. We didn't foresee ten years ago just the form it has taken today. But its greatest value has lain in the fact that it provides a forum in which the representatives of the nations can sit around the table and discuss their problems. More than that, it makes this practice habitual. And once you get people talking out their troubles around the table, then the war mentality disappears."

Cannot Purchase Seed Oats

Department Of Agriculture In Saskatchewan Belches Limit Of Authority

Saskatoon.—The Saskatchewan Department of Agriculture has reached the limit of its authority to purchase seed oats," says a letter received by the United Farmers of Canada from the field crops at Regina.

"If, however," says the letter, "any of your members wish to submit their holdings with a view to any possible subsequent purchases, they should submit a full quart sample to the office of the field crops branch and at the same time send a sample to the Dominion Seed Branch, at Saskatoon, for a germination test."

W. N. U. 1819

A New Year's Tragedy

Seventy Children Perish In Moving Picture Theatre Fire, In Scotland

Paisley, Scotland.—With 70 of its children dead, 11 fighting for their lives, and 25 others in hospital, this drab factory town faced the New Year with a broken heart.

Gone was any feeling in festivities. Not even a message of sympathy from the King and Queen could help much. There was a promise of three investigations into the recent tragedy, in which so many children came to grief during fire panic at the Glen Cinema, but this could not put joy in desolate homes.

A movement was started here and in London for a relief fund.

Relentless rain beat down all day upon Paisley. It began last night while yet frantic parents fought to enter the mortuary and identify their dead. It beat down on Paisley Square, where at midnight, true to Scot traditions, a little group of men and women gathered to sing "Auld Lang Syne" as the clock struck 12. The voices broke and ended with sobs trailing off in the rain.

It was the tragedy of "door that jammed." The actual cause of the panic is now said to have been the inability of the assistant operator to open a side door when running away with the burning film. Before the door could be opened fumes spread through the building and terrified the children scrambling for the exit.

Firemen and helpers found children on the stage, in the orchestra pit, everywhere, some in their terror tried to climb the moving picture screen. "The scene on the stairway," says Deputy Firemaster Wilson, "made even seasoned firemen shudder. For ten children were packed tightly together in every imaginable position, like a wall of cement bags."

It is considered doubtful if some of the rescued children will ever fully recover from their experience. One little boy was found in a corner with bodies piled above his waist. When firemen reached him he was looking upwards, gesticulating, as if trying to push some horror back with his hands. He still thought he was fighting for his life.

India Nationalist Congress

Serious Split Occurs In Ranks Of Followers At Gathering, At Lahore

Lahore, India.—A serious split arose in the ranks of the all-India Nationalist Congress at the gathering concluded amidst cries of "bandemara" (hail the Motherland).

Under the leadership of Srinivasa Aiyengar and Subash Bose, 30 members of the Congress walked out and, in a protest meeting, formed a "Democratic" party within the congress.

The minority had demanded representation on the new working committee and when the congress adopted the list as a whole, the disgruntled members walked out, one delegate remarking that the committee could scarcely complain, since the congress had sanctioned such walkouts from the legislative councils.

The dissentient group announced that the work of the congress would be carried on by them in principle.

The congress, however, elected the list as proposed by Mahatma Ghandi, Nationalist leader, omitting the names of Srinivasa Aiyengar and Subash Bose. Ghandi, in the congress, had urged the new working committee should include only those who were entirely sympathetic toward the congressional parliament.

In his final address to the congress, President Jawaharlal Nehru precipitated the "hail the motherland" cry from 15,000 throats when he declared that India's cry for independence has already resounded throughout the world, and that Indians beyond the borders of their country are now enabled to hold their heads high.

Soviets Abolish New Years

Moscow.—Business as usual was the order for this New Year's Day, which has been consigned to the limbo of "abolished" days together with other holidays, and Sundays in the Soviet Union. The New Year's tradition though is too deeply rooted to be wiped out by a legal edict. In thousands of Russian homes the advent of 1930 was hailed amidst merry-making greatly stimulated by the effects of vodka.

YOUNGEST SON OF KING AND QUEEN

Prince George, youngest son of the King and Queen, who received on December 20, congratulations from his many friends upon his 27th birthday, which marks an encouraging improvement in his health. He recently had been suffering from an indisposition.

Japan Wants Adequate Navy

But Is Not Seeking Equal Parity With U.S. and Britain

Ottawa.—The views of the Japanese Government on the disarmament conference, to be held this month, were expressed by Hon. I. M. Tokugawa, Japanese minister to Canada, in an interview here. In a succinct manner, Mr. Tokugawa, who recently returned to Washington, outlined the views of his government in the following manner:

"The motto expressing Japan's requirements is adequate for defence; inadequate for aggression," he said.

Japan does not seek equal parity with British or the United States navy. The national conviction of Japan is that her minimum defence strength expressed in terms of ratio is 70 per cent. of the strength to be maintained by the strongest navy.

Japan is opposed to the abolition of submarines, the minister declared. In the first place, submarines are a type of warship necessary for the defence of a nation having an inferior naval strength.

Japan is willing to abandon the existing program for having more submarines than at present, but deems it necessary to retain practically the same strength as she actually possesses.

Carloads Of Farm Tractors

North Portal, Sask.—A solid train of 35 cars of farm tractors in the C.P.R. yards here attracted considerable attention. The big shipment totalling 140, four to a flat car, was shipped from Charles City, Iowa, by the Iowa Oliver Farm Equipment Co., and destined to farm implement agencies in Calgary, Lethbridge and 30 Albertan towns. A second train load will follow the middle of January.

Sixteen Executed Last Year

Ottawa.—According to official figures just made public, 16 people were executed in Canada last year—seven in Quebec, four in Ontario, three in Saskatchewan, one in Alberta, and one in British Columbia.

POSTPONED HONEYMOON

Grahame Longley, mechanic of the leading MacAlpine rescue plane, is one man who kept his bride-to-be waiting and got away with it. The wedding had to be postponed twice while the groom searched the frozen North for the lost adventurers. He is shown with his bride, the former Irene Kenchington, of Winnipeg, about to board the special train from Montreal en route to England by the Canadian Pacific Liner, "Duchess of Richmond."

Will Discuss Many Subjects

Private Members Of Federal Parliament To Take Active Part In Next Session

Ottawa.—Parliament at its coming session faces an unprecedented variety of subjects for discussion. The speech from the throne, the tariff, the budget and estimates—all milestones in the progress of each session of Canadian parliaments—will naturally be debated. But in the millions of words which are uttered between the time parliament convenes and prorogues, private members purpose at the approaching session to play a considerable and diversified part in discussions.

Nationalization of the supply of radium; increased subsidies to the maritime provinces; establishment of chairs of international peace and interantional scholarships in Canadian universities; continuation of Dominion assistance to technical education and to highways; Dominion grants for provincial health units; early development of the St. Lawrence waterway by treaty between Canada and the United States; curtailment of assistance to immigrants; proposal that estimates be considered by special standing committees before submission to committee of the whole and interim credits for agriculture—all these are scheduled for discussion on the floor of the House of Commons at the session to open in February.

The Canadian Conscience

Dominion Exchequer In Receipt Of Money From Anonymous Senders

Ottawa, Ont.—The Canadian conscience is improving. The year 1929 will mark payment into the Dominion exchequer of more than \$500 in conscience money. Two dollars is the usual amount gnawing at the conscience of the sender.

From east, west, north and south, with only the post office stamp indicating the place origin, envelopes containing "conscience money" have been reaching the department of finance. The sender takes little or no chance of his identity being disclosed. Government officials never seek to find out.

Bills are usually wrapped in blank note paper. Seldom, if ever, is the nature of the indebtedness revealed by the sender. But, occasionally, a terse note with the words customs or smuggled goods or income tax accompanies the money.

New Year's, Christmas and Easter are the greatest "revenue" periods for Canada from this source.

Finds New Territory

Australian Explorer Discovers Unknown Land In Antarctic

Montevideo, Uruguay.—The government radio service has announced receipt of message saying that Sir Hubert Wilkins, Australian explorer, had discovered territories previously unknown in his last flight over the southern Polar ice cap. Details of the new lands were not given.

The message came from the steamer "Melville" which carried the explorer to Deception Island, which he uses as his base.

TRANS-CANADA AIR MAIL SERVICE MAY SOON COME

Ottawa.—Canada is rolling her map northward. The cry to go West is giving way to the call of the north. And, in pushing back the frontier—with untold millions in riches of the Canadian northland as the magnet—the Dominion's air mail service is playing a leading role. More than 1,000,000 miles have been traversed in the closing year of 1929 by Canada's air mail planes. Nearly another million miles in air mail service will be added for 1930 at the opening on February 1, of the Winnipeg-Regina-Calgary air mail route with offshoots to Saskatoon, North Battleford and Edmonton.

To 300 miles within the Arctic circle, Canadian mail planes travel. Oil, gold, silver, copper, nickel and fur-trapping centres in Ontario, Quebec and Western Canada today are being served by these aerial mail carriers, making more habitable the bleak wood districts with little or no road. In Ontario's northland, the Red Lake and Narrow Lake mining centres have their regular deliveries of mail by air.

Today, twelve air mail routes are in operation: Montreal-Detroit; Montreal-Albany; Toronto-Buffalo; Montreal-Ottawa; Montreal-Rimouski; Quebec-Seven Islands; Quebec-Anticosti; Moncton-Magdalen Islands; Leamington-Pele Islands; Narrow Lake-Sioux Lookout; Lac Du Bonnet-Bissette; Fort McMurray-Akavik; Montreal-Saint John, and Oskelange-Chibougamau.

Two great connecting links which would complete a trans-Canada air-mail service are mooted for the near future, one from Montreal to Winnipeg; the other from Calgary, Lethbridge or Edmonton to Vancouver. Early in the new year Canadian air officials contemplate making a survey to determine the best route from Alberta to the Pacific Coast. This fact lends color to the probability that parliament may be asked at the next session to make the necessary appropriations for these new routes. An air mail service of one business day and two nights from Montreal to Vancouver is the goal.

Canada Exporting More Manufactured Goods

Review Shows Great Increase For Year Just Closed

Ottawa.—Canada is exporting more manufactured and semi-manufactured goods now than ever before. At the same time, largely because of the stoppage in the selling of wheat, there has been a marked decrease in the total volume of exports of raw materials. Annual reviews, setting forth the trade situation have been prepared by Hon. James Malcolm, Minister of Trade and Commerce.

The review points out that industrial activity, measured by exports, was at a record high level in the year just closed. Industrial employment was at a generally higher level than in 1928; construction contracts were at a higher peak than ever before; the aggregate value of cheques passed through chartered banks was the highest in the history of Canada; a new high record of money was invested by the public in life insurance policies and production in basic industries such as iron and steel, Newsprint, coal and coke, mining, automobiles and electric energy all showed substantial increase over previous years.

The minister announces further that while the department of trade and commerce has already done much to supply necessary channels for Canadian manufactures and producers to export their wares, namely, a trade commissioners' service, further extensions in the direction are being planned for the immediate future.

There's a wild streak in Capt. Orlebar who flew the British plane 363 miles an hour. He is a croquet addict.

California's orange crop would fill a train of box cars extending from Boston to New York, and six miles beyond.

Editor and Publisher"WHAT MAKES CANADIANS
CANADIAN"

(The Vancouver Sun)

Every time an American comes to
Canada to live, his secret determina-
tion seems to be to try and make
this country English.The resisting of these two opposing
impulses is a good thing for this co-
untry, because it is what makes Canada
Canadian. Canadian personality is
welded out of the clash between En-
glish influences and American influ-
ences.Canadians are able to realize that
the American is going too fast. His
rational, scientific action, his business
philosophy of make or break, and his
restless business ambition tend to
make a business machine which has
created an astounding prosperity in
the United States.But have these things made Ameri-
cans happier? Have they added to the
richness and fullness of American life?
Are the American standards of suc-
cess based on true and lasting pre-
mises?The Englishman, on the other hand,
is going too slow. His industrial phil-
osophy is archaic. Maintaining a vast
army of middlemen, he lets the work-
men do what the machine should be
doing. He devotes his time to political
philosophy and economic theories rather
than to practical action. He is the
source of big world talk and big politi-
cal talk.But the Englishman has a cultural
setting and an aesthetic background
that the American, as a class, lacks.Canada cannot afford to adopt either
English or American methods in their
entirety. She must pick the best of
each and apply them to her own pec-
uliar problems.And the sooner Americans and En-
glishmen in Canada realize this fact,
the sooner they realize that this is
CANADA, the sooner will they become
good Canadians and make the going
easier for themselves.

Meantime, the pressure from both

sides is forming and building up a
distinctive Canadian personality.And that personality is an engaging
and a hopeful one. Johnny Cannuck
is sitting here with 3,729,665 square
miles, including some of the most pro-
ductive soil in the world; sitting here
with vast resources, with minerals,
including 95 per cent of the pre-Cam-
brian shield containing the great ore
deposits of the world; sitting here with
a variety of climate unequalled in any
other country on earth.His vigorous Nordic temperament
gives him the energy to develop his
possibilities. His historic background
gives him cultural appreciations.His achievements and his blood give
him a pride and a determination, as
he sits here on his fortune, not to be
led by the nose this way or that, but
to make a distinct and powerful per-
sonality for himself and for his coun-
try, CANADA."GRIP OF THE YUKON" AT
CARBON THEATRE THIS WEEKFarrell O'Neill is one of the myster-
ies of the Yukon who comes to town
and pays for his grub and liquor with
sacks of gold nuggets. He is surprised
in his cabin by two lost prospectors
named Colby MacDonald and Jack El-
liott shortly after sending money to
his daughter in the States so that she
might join him in the spring. They
fight and O'Neill is killed which leaves
the two partners in possession of the
gold mine. They work the claim and
when Sheila O'Neill arrives looking for
her father they become quite infatuated
over her, not knowing she is the
daughter of the man they murdered.After many months of waiting Sheila
is forced to work in a dance hall for
Chardon, a crook, and when she is not
able to pay for her food she is insulted
and is asked to marry Chardon. She
refuses, but puts herself on "auction"
promising to marry the man who wins
her in a poker game in which the ante
is \$5,000. She is to get the money from
the winner in payment of herself. Jack
Elliott and MacDonald play and win
the girl, but on the pretext of being
partners will let her choose her hus-
band. The partners take her to their
cabin and after learning it was her
father whom they killed, cannot make
love to her. They eventually fight over
her and MacDonald gives his half of
the girl for Elliott's half of the mine.
Just as Jack and Sheila are leaving the
cabin the U.S. Marshall arrives
to place them under arrest for the mur-
der of O'Neill, but Jack gets away with
his dog team and is pursued by Mar-
shall Hoyt. Sheila has been wounded
by a bullet from Hoyt's gun and as
Jack races with her to the doctor
they break through the ice over the ri-
ver and are frozen in. The Marshall
follows them. Thirty years later Colby
MacDonald discovers his partner in a
cake of ice with Sheila clasped in his
arms and the Marshall some distance
from them.A colored sentry was making his
rounds one night when he heard foot-
steps."Halt, dere you! Who goes there?"
The cook with a plum pudding,"
was the reply."Pass on the cook—stay where yo'
is, plum pudding."

"DON'T DODGE IT"

Debt is a horrid thing—a monster
whose presence can make a life mis-
erable and unhappy. It has been so
easy to make purchases and say
"charge it." The future is always hope-
ful and to leave obligations to be met
at a future time is sometimes neces-
sary, but in the great majority of cases
quite unnecessary. It is not fair to
any tradesman to keep him waiting
for his money and the price of his
goods must give him a margin large
enough to carry unpaid debts. It all
comes back on the consumer in the
end. The chain stores that demand the
cash on receipt of goods are able to
eliminate the margin that the inde-
pendent retailer must carry. These
stores are also teaching housewives
the beauty of "pay as you go." Then,
too, one learns to buy more discreetly
and sensibly if hard cash enters con-
cretely into the transaction. —Ex.

Railway Baby

445

Born on the Canadian Pacific Railway Express Train "The Dominion" near Kanaka, British Columbia, recently, the smiling infant shown with her mother above has been christened Christina Patricia Rosalind, the names being arranged in the initials C.P.R., in honor of her railway birth. Little Miss C.P.R. is the daughter of Mr. and Mrs. J. Peterson, North Vancouver, B.C.

Written By A Man

As the south pole to the north,
As the third speed to the fourth,
As the moonlight to the sun,
As the butter to the bun,
As the trimming to the frock,
As the seltzer to the Hock,
As the needle to the pole,
As the football to the goal,
As the paper to the news,
As the cushions to the pews,
As the feather to the hat,
As the Welcome to the mat,
As the label to the can,
So is Woman to the Man.

A
BUYING
GUIDE!

BEFORE you order dinner at a restaurant you consult the
bill-of-fare. Before you take a long trip by motor-car, you
pore over road maps. Before you start out on a shopping tour
you should consult the advertisements in this paper. For the
same reasons!

The advertising columns are a buying guide to you in the pur-
chase of everything you need—including amusements! A guide
that saves your time and conserves your energy; that saves useless
steps and guards against false ones; that puts the s-t-r-e-t-c-h
in family budgets.

The advertisements in this paper are so interesting, it is diffi-
cult to see how anyone could overlook them fail to profit
by them. Just check with yourself and be sure that you are read-
ing the advertisements regularly—the big ones and the little ones.
It is time well spent always.

AVOID TIME WASTING, MONEY WASTING
DETOURS ON THE ROAD TO MERCHANDISE
VALUE. READ THE ADVERTISING "ROAD MAPS."

Who Does Your
Printing?

All business houses need more or less printed matter, all of which is within the possibilities of the local printer. Yet how prone many are to pass up the home printer and let the orders go to city offices which have no interest whatever in rural communities except to get printing orders and the cash to pay for them. Business men, remember that the home paper is constantly promoting the interests of the home community and you owe it to yourself and your local paper to back up these efforts by at least having your printed matter done locally.

WHEN IN NEED OF PRINTED MATTER CONSULT

Splendid For SKIN TROUBLES

The Singing Fool

By HUBERT DAIL

Copyright, 1928, Warner Bros. Pictures, Inc.

SYNOPSIS

Al Stone, singing waiter at Blackie Joe's New York night club, marries Molly Winton, a ballad singer, not knowing he is loved by Grace Farrel, a loyal little cigarette girl. After Al wins fame as a composer of popular songs, Molly elopes with John Perry, taking her baby, Junior, as she sails for France. Al, broken by the loss of his son, becomes a derelict, but is saved by Grace Farrel. Molly obtains a Paris divorce from Al, but Perry deserts her. Junior is taken ill. In New York Al scores a success as a revue singer and plans to marry Grace. The couple arrive at the theatre one night happy because of the news of Molly's divorce.

CHAPTER XXIX.

They were both radiant as they approached the doorkeeper.

"How are you, Shakespeare?" called Al, clapping the old man on the back. Then, quick as a wink, he snatched the chewed stub from the doorkeeper's mouth and replaced it with a four bit perfecto. The oldtimer smiled delightedly and saluted as Al and Grace went on into the theatre.

A group of chorus girls, hoofers and singers, who went on early, were already standing near the wings, gossipping and laughing. They turned to greet Al and Grace.

From Mother of Six

"I think Lydia E. Pinkham's Vegetable Compound is wonderful. I have had six children of which four are living and my youngest is a bonnie baby boy now eight months old who weighs 23 pounds. I have taken your medicine before each of them was born and have certainly received great benefit from it. I urge my friends to take it as I am sure they will receive the same help I did." —Mrs. Milton McMullen, Vanessa, Ontario.

Lydia E. Pinkham's Vegetable Compound

Lydia E. Pinkham Med. Co., Lynn, Mass. U. S. A. and Cherbourg, Ontario, Canada

W. N. U. 1819

"Pretty soft for the little old black-face comedian, strolling in here at show time, and doesn't have to go on until nine," said a vivacious soubrette, smiling gaily.

"Soft is right," agreed Al, "You don't think I'd be in this revue if there was any hard work to do?"

The soubrette laughed. She and the others knew that Al was really the hardest worker in the show. He linked his arm familiarly in that of the little singer, pretending to glance apprehensively toward Grace.

"Let's step out tonight—you and me!" he remarked, sotto voice, to the soubrette. "Supper—wine—music—eh? What do you say?"

Again he looked toward Grace, but she only stuck out her tongue at him even so slightly and refused to become jealous.

Meanwhile, the soubrette had drawn away in mock hauteur. "Sir, I don't know you. Besides I've an engagement after the show with four great big oil-and-money men from the southwest."

"That's three too many," said Al lightly and, slipping his arm around Grace, he strolled on toward his dressing room.

He was in good humor tonight, not only because he realized that he and Grace were soon to be married, but because he had at last persuaded Grace to leave Blackie Joe's. She had hung onto that job of hers at Blackie's like grim death, refusing to give it up until recently.

"I'd feel lost without it, Al," she had said when he first broached the subject of her leaving. "Besides, I feel loyal to Blackie. He's looked after me and protected me."

"Yes," said Al, "but you've been there four years. That's long enough. Blackie will hate to lose you, but he'll be good about it. I want you to have some rest."

So Al had his way; just today Grace had said good-bye to Blackie's and given up her tiny room in the Waverley Place lodging house to move uptown to more palatial quarters.

As they headed through the backstage corridors a page hurried up to Al.

"A lady wants you on the 'phone, Mr. Stone."

"A lady," repeated Al. "What is this strange power I have over women? Was it a blonde or a brunette voice?"

The page boy grinned while Al went off to answer the 'phone. Grace strolled slowly after him, wondering who was calling. She saw him pick up the receiver and hear him say casually.

"Yes, this is Mr. Stone speaking, who's this?"

Then Grace saw a pained, almost bitter expression pass across his features. His face went pale and he clapped his hand over the transmitter and turned to whisper:

"It's Molly." A stab of pain shot through Grace. Had her fear that Molly would turn up to make trouble come true? Al drew back from the 'phone as if he would hang up; then he reconsidered.

"What is it?" he asked coldly.

Grace saw him nod, then he hung up the receiver and turned to her again.

"Molly says to come to the Good Samaritan Hospital as fast as I can."

"Why?"

"She didn't say. Simply that, and hung up. I wonder if it's a trick of some kind?"

Grace's eyes narrowed; her heart was throbbing hard and fast. But she forced herself to say:

"You ought to go, Al."

"I suppose so. Yet every time Molly has come into my life it has meant misery."

"Yes, but—" Grace paused. "Do you think there's anything the matter with your boy?"

The suggestion electrified Al into action. "I'll go! And you wait here, Grace. I'll be right back." He ran toward the stage door. When Grace reached it he was already in his car and the motor was whirling. She saw him shoot down the alley and out toward the lights of Broadway.

It was the theatre hour — the streets were loaded with traffic. It seemed to Al that he would never be able to force his way through the jam. But finally he did work out of the theatrical section and went speeding along a quieter street, then out the Avenue.

How did Molly happen to be in America so quickly after her divorce? why had she called him; was Junior ill? These questions and a swarm of other queries raced across Al's mind.

ASTHMA

FREE TRIAL PACKAGE of Dr. J. H. Guild's Green Mountain Asthma Compound, sent on request. Originated in 1869 by Dr. Guild, specialist in respiratory diseases. Its pleasant smoke vapor quickly soothes and relieves asthma, also catarrh. Standard remedy at dispensaries, 60 cents a box, 50c. powder or cigarette form. Send for **FREE TRIAL PACKAGE** of 6 cigarettes. Canadian Distributors, Lyman's, Ltd., Dept. BB-2, 286 St. Paul St., West, Montreal, Canada.

Dr. Guild's GREEN MOUNTAIN ASTHMA

He sat at the wheel, with grim face and fixed, tortured eyes. Sheer force of habit took him through the traffic unscathed.

He recalled Junior as he had seen him last on that memorable afternoon in the park, roly-poly and the picture of health. It seemed to himself impossible that anything tragic could have happened to his beloved child. Surely Grace was wrong.

But Grace was right. In a tiny bed at the Good Samaritan lay Junior, his eyes listless, his face wasted and as white as the sheets, except for a tiny crimson spot on each cheek.

He roused himself, finally, and whispered to Molly, who hovered over him:

"Is Daddy coming? I want my Daddy?"

Molly had been standing by Junior's bedside, rigid with fear. As she spoke she leaned over quickly and touched his tiny, thin fingers.

"Yes, darling, Daddy will be here soon. He's on his way. Just a few moments and you'll see him."

Junior turned away from her with a sigh and his eyes closed, as if the strain of his question had taken his fast-ebbing strength. He did not see the expression of agony on his mother's face and her tears that fell unchecked on the coverlet.

Now the doctor came forward and tapped Molly on the arm. She followed him from the little white room into the hallway, clasping her hands before her as she gazed beseechingly up into his eyes. Her face was aged by the terrible experiences she had lived through during the past few weeks.

"Is there any hope?"

"I'm afraid not," said the doctor gently. "The thing has made too much progress — his lungs are almost entirely gone. He hasn't the strength to fight the disease."

Molly turned away, sobbing convulsively. She didn't want to hear details if there was no hope. She realized only too well that her own neglect of Junior had started him toward this tragic condition. After Perry's desertion of her in France she had reclaimed her boy, but it was too late. She had seen him waste away before her eyes, in spite of all the French doctors could do. Finally, in a panic, she had raced to Cherbourg and taken a fast liner to America. Then another race to the hospital when they arrived in New York the night before. Not until the terrible fear seized her that Junior was really dying did she call Al.

She glanced out the hallway window to see a sport car swoop up the street to the curb and stop. Al jumped out and ran toward the hospital entrance. Molly met him.

(To Be Continued.)

Canada and Air Traffic

All Air Highways Of Northern Hemisphere Will Pass Through Dominion

Addressing the Canadian Club, of Montreal, on expanding trade prospects in Canada, John W. Dafoe, managing editor of the Manitoba Free Press pointed out that, "all the air highways of the northern hemisphere pass through Canada, not the United States. The route from New York to the cities of Asia will pass, not through San Francisco or other ports of the Pacific states, but over the Canadian border up to Toronto and then north to Nome. The route from the central states to Europe will go north to Winnipeg." He added that not certain sections of Canada but the whole of the Dominion would benefit by the air traffic in question.

Queer Animals In Zoo

In the "Aye-Ayes," the old London Zoo has a pair of the weirdest animals in the world. They have been referred to as the animal night mares. They are about the size of a cat, have large, bushy tails and a head resembling that of a bat. The body is covered with long, streaked fur. Its middle finger resembles that of a human. They are great egg eaters.

Falling Hair—Just try Minard's.

Drought-Resisting Animals

South African Sheep Manage In City Without Water For Three Years

A flock of 600 sheep on the South African Government farm at Graaff Reinet, have just had their first drink of water for three years, but many, having lost their taste for it, turned away disgusted.

These sheep have been the subjects of prolonged experiment as drought-resisting animals, and during the whole period they have been fed on oil cake and prickly pear only, without any form of liquid.

It has been found the prickly pear — which hitherto has been regarded as a grave menace to farmers in South Africa and Australia, where thousands of acres have been ruined by it — contain all the necessary moisture to sustain livestock indefinitely.

During the three years lambing and the wool yield have been perfectly normal.

DO NOT NEGLECT YOUR LITTLE ONES

At no time of life is delay or neglect more serious than at childhood. The ills of little ones come quickly and unless the mother is prompt in administering treatment a precious little life may be snuffed out almost before the mother realizes the baby is ill. The prudent mother always keeps something in the medicine chest as a safeguard against the sudden illness of her little ones. Thousands of mothers have found through experience, that there is no other medicine to equal Baby's Own Tablets and that is why they always keep a box of the Tablets on hand — why they always feel safe with the Tablets.

Baby's Own Tablets are a mild but thorough laxative which by regulating the bowels and stomach banish constipation and indigestion; break up colds and simple fevers and promote healthy, natural sleep. Concerning them, Mrs. Isaac Sonia, St. Eugene, Ont., writes:—"I have been using Baby's Own Tablets ever since baby was a month old and have found that they reach the spot and do more good than any other medicine I have ever tried. I always keep the Tablets in the house and would advise all other mothers to do so." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

THEATRE

FRIDAY AND SATURDAY

JANUARY 10 & 11

NEIL HAMILTON

— IN —

Grip of the Yukon

A STRANGE BEAUTIFUL GIRL PLAYING A LONE HAND.

The talk of the Yukon! Beautiful and aloof she was, caring for no man, asking favors of none. But seeking, seeking always with her eyes on far horizons, always scanning faces. How they fought for her—for a smile from her lips! And then, when she found the evil secret in the face of the man—

DON'T MISS IT

FIELD SUPERVISORS TO COMMENCE WORK JANUARY 27

To Alta. Municipal Councils:

The Provincial Department of Agriculture wishes to draw your attention that a number of Field Supervisors have been appointed to commence work on January 27th, for a period of one month. These men will endeavor to visit all councils in the province with a view to stimulating more interest in Weed Control. They will also be prepared to hold special meetings from time to time in the different municipal districts.

You can therefore expect to hear from one of these men within the next month of five weeks. If there are any special Weed meetings that you desire, I would be glad if you would advise this office at once. Or if there is any particular time that you would prefer one of the Supervisors to visit your council, kindly signify to us at your earliest convenience.

Weed Inspector's Diploma Course

I beg also to draw your attention to a Weed Inspector's Diploma Course to be conducted by the Department at the University of Alberta, during the week of February 17th. We trust that you will give this course publicity, and that a number of men from your district will see fit to take this course which is intended to fit them for Weed Inspectors. If they complete the course satisfactorily a diploma will be issued them. There are no fees in connection with this course, and the only expense that candidates will be put to is railroad fare and room and board while in the city. Prospective candidates should advise this Branch as soon as possible.

Yours very truly,
W. J. STEPHEN,
Field Crops Commissioner

"My wife looks well after me. I assure you that she takes off my shoes for me in the evening."

"What! When you come from the club?"

"No, when I want to go there."

"Darling," she said, weeping, "when we were married five years ago, I never expected to see you coming home at 1:00 o'clock in the morning."

"Well, you wouldn't now, m'dear," he replied, "if you'd only go to sleep earlier."

No matter how full a street car may be, it generally can go straight.

SCENE — MOUNTDALE, A VILLAGE IN THE ROCKIES

ACT I—Jake makes a morning call. Bird tries to cure her disappointment by making herself useful. Smith receives a royal welcome all around the family circle. Sunshine and Bird exchange confidences. Smith solicits Bird's assistance. Westcott offers Sunshine a chance. Smith meets Sunshine. "I'm on the job."

ACT II—The wickedness of the world. A game of checkers with no prize at stake. Bird and Mrs. Bright discuss Westcott. Ethelbert Ferdinand Delancy's picture given Bird an unpleasant shock. A faded dress with old-time memories. Smith confesses a fancy for Sunshine and furnishes a program of "canned music" with varying effect. "That voice!" Jake practices a little to strengthen his muscle. Westcott plays a trump card and the game seems to turn in his favor. Bird holds the joker and the game is saved. "Don't you folks want some light?" "You shall marry her!"

ACT III, Scene I—Sunshine hears the true story of the lost Star. Madame Ormand selects her room and wins Sunshine's confidence. "The picture with its face turned toward the wall."

ACT III, Scene II (One hour later) — "I'm here just in time for the ceremony!" Smith and Smythe have a clash and Ethelbert Ferdinand Delancy is unmasked. "Cremating a has-been." Melinda and Jake arrive at last. Westcott refuses to be a quitter. "Do your worst, Madam! I defy you!" The draping of the wedding veil serves to reveal the bride's heart. The divine purpose in a great sonow. "This marriage cannot be. I forbid it!" Smith explains and Star comes into her own. College once more in sight for Sunshine. Bird introduces her real lover and all sunny dreams come true at once. Jake strikes a bargain. "Come on, 'Lindy'!"
